

3-6 Add modules

<http://www.websuburb.com.au/HelpDesk/Modules/Addmodules/tabid/186/Default.aspx>

3-6.1 Step 1 Select module from drop down list

- The Modules menu is found at the top of the page.

- Click on the drop down box indicator to show the list of available modules.
- Mouse down until you find the Text/HTML module and select this by single clicking with the mouse.
- Select Text/HTML from the Module drop down list

Figure: Select Text/HTML from Module Menu drop down list

3-6.2 Step 2 Select destination from the Pane drop down list.

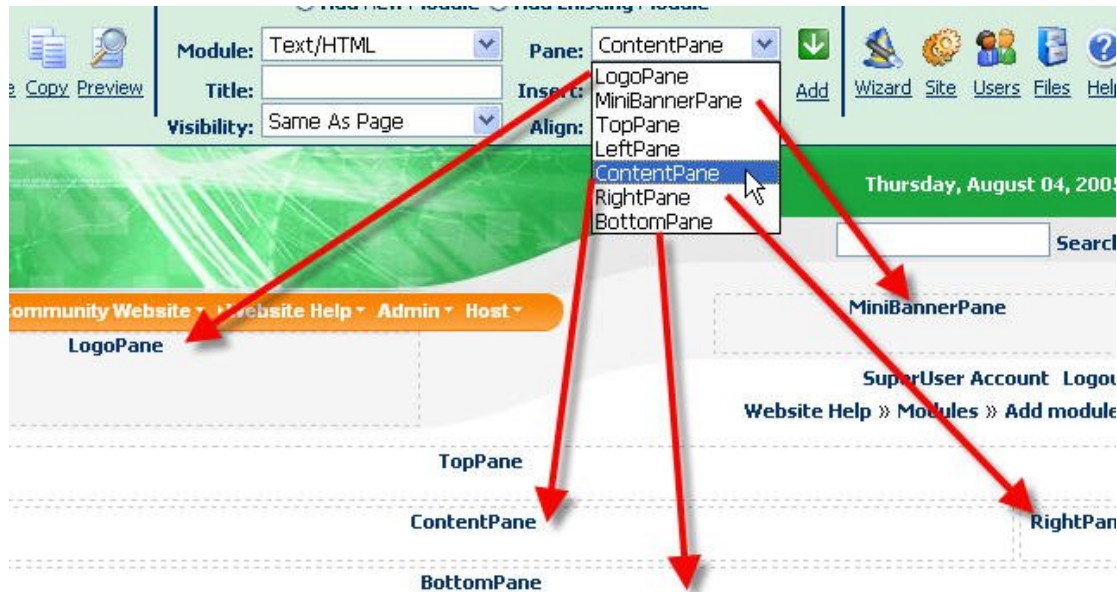

Figure: Selecting the target location

3-6.3 Step 3 Add the module

- Click on the Add button or Add link
- That's it! The page will refresh and the module will be added.

Add Existing Module

Pane: ContentPane

Insert: Bottom

Align: Left

Figure: Add button

The next step in session 2 is Add content.
